Summary

B.Tech Computer Science (AI) student with strong foundation in data structures, algorithms, and cloud technologies. Experienced in full-stack development, machine learning, and scalable solutions using Azure and AWS. Passionate about building innovative, customer-focused software products.

Education

Vishwakarma Institute of Technology, Pune

2023 – 2027

B.Tech in Computer Science and Engineering(Artificial Intelligence)

CGPA - 8.83

Experience

Data Science Intern | Cognify Technologies

May 2024 - Jun 2024

- Implemented *engineering principles* to preprocess and model datasets, boosting ML accuracy by **15%**.
- Automated data cleaning in Python, cutting processing time 30%.
- Collaborated in a *team environment*, applying *best practices* for reliable deployment.

Web Development Head | ISA VIT Pune

Nov 2024 – Present

- Led a team of web developers in designing and deploying multiple projects for the ISA (International Society for Automation) VIT Pune Student Section, enhancing the club's digital presence.
- Fostered collaboration and skill-building within the team, promoting innovation and technical growth.

Projects

Face Anti-Spoofing Detection System | Python, OpenCV, Machine Learning, Flask | Smart India Hackathon 2024 (Grand Finale) | [Link](#)

- Designed a **next-generation software solution** using Python, OpenCV, and ML to secure real-time authentication.
- Delivered an **edge-computing** product meeting stringent reliability and **performance** benchmarks; finalist at Smart India Hackathon.

MediReport Voice – Voice-Enabled Medical Prescription App | Python, Tkinter, SpeechRecognition, OpenCV, gTTS | [Link](#)

- Developed a Python desktop app that lets doctors create and share medical prescriptions hands-free using voice commands, automatically generating formatted PDFs for patients.
- Built with Tkinter, SpeechRecognition, OpenCV, and gTTS to provide an interactive GUI, real-time feedback, and seamless sharing via email or WhatsApp.

AI-Powered EdTech Platform with RAG for Personalization | RAG, LLM, FAISS, Gemini, LangChain, Streamlit | [Link](#)

- Developed an AI-powered EdTech platform using RAG and LLMs to deliver personalized learning experiences, including adaptive quizzes, tutoring, and study roadmaps.
- Integrated Gemini AI, LangChain, and FAISS for semantic search, document/video summarization, and NLP-based student query handling via an interactive Streamlit UI.

Hy-Tech Shopping Cart Using Object Detection and Human Following Technology | YOLOv5, Raspberry Pi, Arduino, OpenCV, ML

- Built an AI-powered shopping cart using YOLOv5, Raspberry Pi, and Arduino for real-time object detection and autonomous human following
- [IEEE Xplore Publication](#) Published and presented the work at an IEEE international conference, recognized for its innovation in combining computer vision based systems with robotics.

Technical Skills

Programming Languages: Python, Java, C/C++, JavaScript, TypeScript, SQL, R, Rust, Go

Web & Cloud: React.js, Next.js, Node.js, Flask, Express.js, Django, Streamlit, REST APIs, Docker, Firebase, Microsoft Azure, AWS, GCP, MongoDB, PostgreSQL, Vercel, Heroku, Postman

AI / ML & Data Science: NumPy, Pandas, Scikit-Learn, TensorFlow, PyTorch, Keras, OpenCV, YOLO, Hugging Face Transformers, LangChain, RAG, Generative AI, GANs, AI Agents, Matplotlib, Seaborn

Coursework: Data Structures & Algorithms, Operating Systems, Computer Networks, DBMS, OOP, Artificial Intelligence, Data Visualization, IoT, Robotics, Problem Solving & Programming

Tools & Dev Practices: Git, GitHub, Linux, Shell Scripting, CI/CD (basic), Jupyter Notebook, Google Colab

Achievements

- **Top 11/497 teams** in Internal SIH'24 '25 at VIT
- **SIH 2024 Finalist (Dec 2024)**
- **5x Hackathon Winner**
- **500+ Days** on LeetCode & 150+ On CodeChef
- Top (13.4%) @LeetCode Max (1,696)
- **1000+ questions solved** on Leetcode & Other Platforms
- Contributor @**GSSoC'2024 '25** Open Source Event
- Contributor @**Hacktoberfest '24**
